Modularized Water Treatment Facilities

KALYU has partnered with leading water treatment companies that specialise in the manufacturing of containerised water treatment facilities. These facilities can be manufactured to be trailer mounted, inside a container, or skid mounted. They can be used as a stand-alone system or linked together to form a more complex system.

Modularized Water Treatment Facilities

- Desalination units
- Waste water treatment units
- Effluent treatment units

About us

KALYU Pty Ltd was founded by Traditional Owner, Jake Milroy, a proud Palyku man from the eastern Pilbara region of Western Australia.

Jake is passionate about building a sustainable business that can add value to the Australian economy and help Aboriginal people and their communities become more independent.

In time, he seeks to provide more Aboriginal people with meaningful employment and training opportunities outside of the mining industry.

Clients & Experience

KALYU's management team has more than 15 years' experience in waste water treatment solutions and the provision of cleaning chemicals. Current clients include the major mining companies, national banks and federal government departments.

Owner Operator, Jake Milroy has a strong network of positive client relationships that he has developed over many years through KALYU and his previous business experience.

"We aim to provide Aboriginal communities with access to safe drinking water. We also hope to inspire a shift, starting at the community level, toward greater self-reliance and a better future."

Our Business Principles

Environmental Sustainability

KALYU has a strong relationship with leading domestic and international chemical manufacturers dedicated to minimising the environmental impact of Industry.

Socio Responsibility

KALYU provides ownership, employment and training for the betterment of the Aboriginal community and is a certified Supply Nation business committed to socially ethical and responsible business practices.

Quality

KALYU chemicals are manufactured in ISO accredited facilities in Western Australia, South Australia and Queensland.
